DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

Exemplary of such:

- ✓ Page 8, line 23, 'plastics' should be replaced with 'plastic'.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 26-29 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Exemplary of such:

- ✓ Claims 26-29, line 1, 'An' should be replaced with 'The'.
- ✓ Claim 28, line 2, it is unclear as to what is meant by 'inverted channel shape'.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 1744

5. Claims 25, 27, 29 and 31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rinard.

Rinard discloses a support which is buoyant and floats on a surface of paint in a container (fig. 1, #2, col. 1, lines 32-37).

Rinard discloses at least opening in the support (fig. 1, #3).

Rinard discloses projections on the support to provide rotation of a roller (fig. 1, #4, col. 3, lines 3-7).

With respect to claim 27, Rinard discloses the support having a cellular nature (col. 2, lines 40-50).

With respect to claim 29, Rinard discloses the support having an axially directed flange (fig. 1, #7).

With respect to claim 31, Rinard discloses positioning a support having a fluid engagement means on a surface of paint and moving a roller along the fluid engagement means (figs. 2 and 4, col. 2, lines 3-11 and col. 3, lines 3-7).

6. Claims 25-28 and 30-31 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Rolin.

Rolin discloses a support which is buoyant and floats on a surface of paint in a container (fig. 1, #2, col. 1, lines 55-59).

Rolin discloses at least opening in the support (fig. 1).

Rolin discloses projections on the support to provide rotation of a roller (col. 3, lines 31-33 and col. 4, lines 25-28).

Art Unit: 1744

With respect to claim 26, Rolin discloses the support having a ring with flexible arms (figs. 1-2, #4).

With respect to claim 27, Rolin discloses the support made from a material which has a buoyancy slightly higher than that of paint (col. 1, lines 65-68 and col. 2, lines 44-47).

With respect to claim 28, Rolin discloses the support having an inverted channel cross-section (col. 3, lines 52-55).

With respect to claim 30, Rolin discloses placement of the support within a paint container that includes a lid (col. 2, lines 48-56).

With respect to claim 31, Rolin discloses positioning a support having a fluid engagement means on a surface of paint and moving a roller along the fluid engagement means (col. 2, lines 57-64).

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.

Art Unit: 1744

4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
9. Claim 30 rejected under 35 U.S.C. 103(a) as being unpatentable over Rinard as applied to claim 25 above, and further in view of Rolin.

Rinard discloses a similar device however fails to disclose inclusion of the support within a container having a lid.

Rinard discloses placement of the support within a paint container (fig. 2, #9,2). Rolin discloses placement of a buoyant support for a roller within a paint container having a lid (col. 2, lines 48-56). It would have been obvious to one of ordinary skill in the art to provide the container with a lid of Rolin in Rinard to allow for ease in transport and storage.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kravitt and Brown disclose buoyant supports within a paint can. Graham et al. discloses a buoyant support within a paint container having a lid.
